Steven.godin.42@gmail.com | (832) 518 - 7204 | Boston, MA | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

OBJECTIVE

Seeking a Software Engineering opportunity where I can design Neural Networks, Machine Learning models, NLP applications, and engineer scalable full-stack solutions.

EDUCATION

Northeastern University, Khoury College of Computer and Information Science

Boston, MA

Candidate for Bachelor of Science in Computer Science and Mathematics

May 2027

Relevant Coursework: Graduate Foundations of AI | Object Oriented Design | Logic and Computation | Foundations of Cybersecurity | Three.js Journey | Fundamentals of CS 1 & 2 | Discrete Structures

Affiliations: Khoury First | Jiu Jitsu at NU | Pi Kappa Phi | ColorStack NEU | HackbeanPot | CareerSprings | infraGuard

PROFESSIONAL SKILLS

Programming and Development: Python | Java | HTML | CSS | JavaScript | JUnit | Three.js | Next.js | Flask | OS

Tools and Technologies: Git | PostgreSQL | Vercel | Maven | Weka

Cybersecurity and Systems: Ransomware | Key-Logger | Metasploit | Ssh | Linux | Kali | ParrotOS | Ubuntu

Artificial Intelligence and Optimization: Neural Networks | Reinforcement Learning | Machine Learning | NLP | Optimization | PyTorch | TensorFlow | OpenCV | Gym | NumPy

ACADEMIC & PROFESSIONAL EXPERIENCE

AI Sign Language Interpreter

January 2025 – April 2025

Python | OpenCV | TensorFlow | Pytorch | NumPy | Scikit-learn | mediapipe

[godinezsteven1/AI-SignLanguage.git](https://github.com/godinezsteven1/AI-SignLanguage.git)

- Architected and coded a complete NLP system using HMMs with segmentation, correction, and captioning.
- Collaborated on CNN model training for gesture recognition across ASL, Spanish, and German sign languages.
- Created a multilingual dataset pipeline with a custom web scraper, integrating all components into a full-stack app.

Stock Simulation

June 2024 – July 2024

Java | Java Swing | API | CSV | XML

[godinezsteven1/StockSimulator.git](https://github.com/godinezsteven1/StockSimulator.git)

- Utilized Java Swing to create a GUI/TUI based interaction to have the ability to buy, sell, create, evaluate portfolios.
- Bridged an API stock call to get real time data on CSV to be processed as an XML for program usage.
- Created a single-source of truth to store API data that were stored locally in jar/ file with following SOLID principles.

EXPERIENCE

Genesys

Remote

Incoming Software Engineer Intern

May 2025 – August 2025

InTouchBHL

Houston, TX

Contract Software Engineer

January 2025 – Present

- Rebuilding companies' front-end using HTML, Tailwind CSS, and Next.js for a seamless UI and experience.
- Engineering companies' back-end using Flask for real time features, business logic and API endpoints.
- Developing a custom postgresSQL database for a technician ticketing system integrated with a dashboard.

SKILLS & INTERESTS

Languages: English | Spanish | French

Interests: Powerlifting | Fishing | HD- Motorcycles | Arduino | Electronics Tinkering | Ethical Hacking | 3D environment design | Algorithmic Reasoning | AI model tampering
